

XO Workshops is an educational platform developed by XO for Software, dedicated to showcasing and selling professional training workshops in technology and career-development fields.

The platform is designed for university students and recent graduates, aiming to bridge the gap between academic education and the requirements of the job market. Through high-quality, practical workshops led by experienced professionals, participants gain valuable skills and real-world knowledge.

At XO Workshops, we empower learners to enhance their technical and professional competencies, strengthen their career readiness, and confidently pursue opportunities in today's competitive job market.

XO Workshops is a training platform by XO for Software that offers professional workshops for university students and graduates. Our mission is to help learners develop practical skills, gain industry knowledge, and achieve the highest level of readiness for entering the job market with confidence.

Design & Branding

The visual identity of XO Workshops should follow the same design language and branding style as XO for Software to maintain consistency across all XO products.

- **Primary Color: Gray**
- **Secondary Colors: Black and White**
- **Design Style: Modern, Professional, Minimalist, and Technology-Oriented**
- **Typography: Clean and modern fonts that ensure readability and professionalism**
- **User Experience: Simple, intuitive, and responsive across all devices**
- **Brand Consistency: The platform should reflect the visual identity, values, and professionalism of XO for Software.**

The overall design should create a professional learning environment that appeals to university students and graduates while emphasizing innovation, career growth, and technical excellence.

Feature 1: User Registration & Email Verification

Overview

The registration feature allows new users to create an account on XO Workshops. To ensure account security and verify ownership of the provided email address, users must complete an email verification step before their account is created and stored in the database.

Registration Form Fields

The registration page must include the following fields:

- **First Name**
- **Last Name**
- **Email Address**
- **Password**
- **Confirm Password**
- **Terms & Conditions Agreement Checkbox**
- **Privacy Policy Agreement Checkbox**
- **Create Account Button**

Registration Process

Step 1: User Registration

The user fills in all required information and clicks the Create Account button.

Step 2: Validation

The system validates:

- **All required fields are completed.**
- **The email address format is valid.**
- **The email address is not already registered.**
- **Password and Confirm Password match.**
- **Password meets security requirements.**

- **Terms & Conditions and Privacy Policy checkboxes are accepted.**

Step 3: Email Verification

If validation is successful:

- **A verification code (OTP) is generated.**
- **The verification code is sent to the user's email address.**
- **The user is redirected to the Email Verification Page.**

Step 4: Verification Screen

The Email Verification Page contains:

- **Verification Code Input Field**
- **Verify Button**
- **Resend Code Button**
- **Countdown Timer for code expiration**

Step 5: Account Creation

If the entered verification code is correct:

- **The user account is created and stored in the database.**
- **The account status is marked as Verified.**
- **The user is redirected to the Login Page.**

Step 6: Error Handling

If the verification code is invalid or expired:

- **An error message is displayed.**

- The user can request a new verification code using the Resend Code button.

Success Flow

Registration Page → Email Verification Page → Successful Verification
→ Account Stored in Database → Login Page

Feature 2: User Login & Password Recovery

Overview

The login feature allows registered and verified users to access their accounts on XO Workshops. It also provides a secure password recovery process for users who have forgotten their passwords.

Login Page Components

The Login Page must contain:

- **Email Address Field**
- **Password Field**
- **Forgot Password Link**
- **Login Button**
- **Create Account Link for users who do not have an account**

Login Process

Step 1: User Authentication

The user enters their email address and password and clicks the Login button.

Step 2: Validation

The system verifies:

- **The email exists in the database.**
- **The account has been verified.**
- **The password is correct.**

Step 3: Successful Login

If the credentials are valid:

- **The user is authenticated.**
- **A session or authentication token is created.**
- **The user is redirected to the Home Page.**

Step 4: Failed Login

If the email or password is incorrect:

- An error message is displayed.
- The user remains on the Login Page.

Navigation

Create Account

When the user clicks the Create Account link:

- The system redirects the user to the Registration Page.

Forgot Password

When the user clicks the Forgot Password link:

- The system redirects the user to the Password Recovery Page.
-

Password Recovery Process

Step 1: Email Submission

The Password Recovery Page contains:

- Email Address Field
- Continue Button

The user enters their registered email address and clicks Continue.

Step 2: Verification Code

If the email exists:

- A verification code (OTP) is generated.
- The verification code is sent to the user's email address.
- The user is redirected to the Verification Code Page.

The Verification Code Page contains:

- **Verification Code Input Field**
- **Verify Button**
- **Resend Code Button**

Step 3: Code Verification

If the entered verification code is valid:

- **The user is redirected to the Reset Password Page.**

If the verification code is invalid or expired:

- **An error message is displayed.**
- **The user may request a new verification code.**

Step 4: Reset Password

The Reset Password Page contains:

- **New Password Field**
- **Confirm New Password Field**
- **Save Password Button**

The system validates:

- **Both password fields match.**
- **The password meets security requirements.**

Step 5: Password Update

If validation is successful:

- **The password is updated in the database.**

- A success message is displayed.
- The user is redirected to the Login Page.

Success Flow

Login Page → Home Page

Forgot Password → Enter Email → Receive Verification Code → Verify Code → Reset Password → Login Page

Feature 3: Home Page

Overview

The Home Page serves as the main landing page of XO Workshops. It introduces visitors to the platform, highlights its mission, showcases key statistics, and provides quick access to available workshops.

Page Components

Header

The page must include a responsive header containing:

- **XO Workshops Logo**
 - **Navigation Menu**
 - **Home**
 - **Workshops**
 - **About Us**
 - **Login / Register Buttons (for guests)**
 - **User Profile Menu (for logged-in users)**
-

Hero Section

The Hero Section should include:

- **XO Workshops Logo**
- **Main Platform Introduction**
- **Platform Mission Statement**

Slogan

"Learn, Apply, and Build Your First Project."

This slogan should be prominently displayed to encourage students and graduates to gain practical experience through workshops.

Workshops Access Section

The page must contain a dedicated section that allows users to quickly access available workshops.

This section should include:

- **Featured Workshops Preview**
- **Browse Workshops Button**
- **Search or Explore Workshops Option**

When the user clicks the Workshops button, they are redirected to the Workshops Page.

About XO for Software Section

This section introduces the organization behind the platform.

It should contain:

- **Brief description of XO for Software**
- **Vision and Mission**
- **Achievements and Contributions**
- **Link to learn more about XO for Software**

Statistics Section

The Home Page must display platform statistics using circular indicators or animated counters.

Displayed statistics include:

Total Users

Shows the total number of registered users on the platform.

Total Workshops

Shows the total number of workshops available on the platform.

Total Workshops Sold

Shows the total number of workshop purchases completed through the platform.

The statistics should be dynamically retrieved from the database.

Footer

The page must include a footer containing:

- **XO Workshops Logo**
- **Quick Links**
- **Contact Information**
- **Social Media Links**
- **Terms & Conditions**
- **Privacy Policy**
- **Copyright Information**

Example:

© 2026 XO Workshops. All Rights Reserved.

User Flow

Visitor Opens Website → Views Platform Information → Explores Statistics → Accesses Workshops → Registers or Logs In → Purchases Workshops

Design Requirements

- Follow the XO for Software visual identity.
- Primary Color: Gray.
- Secondary Colors: Black and White.
- Modern, Professional, and Responsive Design.
- Optimized for Desktop, Tablet, and Mobile Devices.

Feature 4: User Profile

Overview

The User Profile page allows users to view and manage their personal account information. Users can update their names easily, view their account details, and securely manage their passwords.

Profile Components

Profile Avatar

The platform does not support uploading custom profile images.

Instead, the profile avatar is generated automatically using:

- First letter of the First Name**
- First letter of the Last Name**

Example:

- Hashem Shatat → HS**
- Ahmad Ali → AA**

The generated initials should be displayed inside a circular avatar.

Personal Information

First Name

- Display the user's first name.**
- Editable directly from the profile page.**
- Changes are saved immediately after editing.**

Last Name

- Display the user's last name.
- Editable directly from the profile page.
- Changes are saved immediately after editing.

Email Address

- Display the user's registered email address.
 - Read-only field.
 - Cannot be modified by the user.
-

Password Management

The password is never displayed in plain text.

Requirements:

- Passwords must be stored in the database using secure encryption/hashing methods.
- The profile page displays the password as masked characters (●●●●●●●●).

Change Password

When the user selects Change Password:

- The system follows the same password recovery and verification process used in the Login Module.

Process:

1. User requests password change.
2. Verification code (OTP) is sent to the registered email address.

3. User enters the verification code.
 4. If the code is valid, the user is redirected to the Reset Password Page.
 5. User enters:
 - New Password
 - Confirm New Password
 6. Password validation is performed.
 7. Password is updated successfully.
 8. Success message is displayed.
-

Security Requirements

- Email addresses cannot be modified.
 - Passwords must never be stored as plain text.
 - Verification codes must expire after a specified time period.
 - Only authenticated users can access their profile page.
-

User Flow

Profile Page → Edit First Name / Last Name → Auto Save Changes

Profile Page → Change Password → Email Verification → Reset Password → Password Updated Successfully

Feature 5: Workshops Page

Overview

The Workshops Page is the main section where users can browse, search, and access all available workshops offered through XO Workshops.

The page is designed to provide a clean and organized view of workshops while allowing users to quickly find relevant content.

Page Components

Search Bar

A search bar must be displayed at the top of the page.

Features:

- Search workshops by workshop name.

- Real-time filtering of results while typing (optional).
 - Case-insensitive search.
 - Display matching workshops instantly.
-

Workshops Grid

Workshops are displayed in a grid layout.

Layout Requirements:

- 4 workshop cards per row on desktop screens.
- Responsive design for tablets and mobile devices.
- Equal spacing between workshop cards.
- Consistent card size and styling.

Example Layout:

Workshop Workshop Workshop Workshop

Workshop Workshop Workshop Workshop

Workshop Card Components

Each workshop card must contain:

Workshop Image

- Display the workshop thumbnail or cover image.
- Fixed aspect ratio for all workshop cards.

Workshop Title

- Display the workshop name clearly.

Instructor Name

- Display the name of the workshop instructor.

Number of Enrolled Students

- Display the total number of users registered for the workshop.

Example:

"245 Students Enrolled"

Workshop Rating

- Display the average workshop rating.
- Use a star rating system.

Example:

★★★★☆ (4.5 / 5)

Workshop Details Navigation

When a user clicks on a workshop card:

- The system redirects the user to the **Workshop Details Page**.

The Workshop Details Page will contain:

- Full workshop information.
- Workshop description.
- Instructor information.
- Registration/Purchase options.

- **Workshop content access (for enrolled users).**
 - **Ratings and reviews.**
-

Empty Search Results

If no workshops match the search query:

- **Display a friendly message.**

Example:

"No workshops found matching your search."

Design Requirements

- **Follow the XO for Software visual identity.**
 - **Primary Color: Gray.**
 - **Secondary Colors: Black and White.**
 - **Modern and responsive card design.**
 - **Smooth hover effects on workshop cards.**
 - **Optimized for desktop, tablet, and mobile devices.**
-

User Flow

**User Opens Workshops Page → Searches or Browses Workshops →
Selects a Workshop Card → Redirected to Workshop Details Page**

Feature 6: Workshop Details Page

Overview

The Workshop Details Page provides complete information about a selected workshop, allows users to enroll, access workshop content, track their progress, and receive a certificate upon successful completion.

Page Components

Workshop Introduction Video

At the top of the page, a promotional/introduction video for the workshop is displayed.

Purpose:

Introduce the workshop content.

Present learning outcomes.

Explain the target audience.

Encourage users to enroll.

This video is available for all visitors and users.

Workshop Videos List

A sidebar or dedicated section displays all workshop lessons.

Each lesson includes:

Lesson Title

Lesson Number

Duration

Completion Status

Lock/Unlock Status

Access Rules

Before Enrollment

Only the introduction video is accessible.

All workshop lessons remain locked.

After Enrollment

All workshop lessons become accessible.

Users can watch all workshop videos without restrictions.

Locked lessons should display a lock icon until enrollment is confirmed.

Instructor Information

A dedicated section displaying:

Instructor Name

Instructor Photo or Initials

Professional Title

Short Biography

Experience and Qualifications

Enrollment Section

The page includes an Enroll Now button.

When clicked:

The user is redirected to a WhatsApp conversation with the workshop registration number.

The user communicates directly with the workshop administrator to complete the enrollment process.

After enrollment is confirmed by the administrator:

The user's account is marked as enrolled in the workshop.

All workshop lessons are unlocked automatically.

Workshop Progress Tracker

A progress bar must be displayed beneath the workshop content.

The progress bar tracks:

Watched lessons

Completed lessons

Overall completion percentage

Example:

Progress: 75%

The progress bar updates automatically as the user watches workshop content.

Workshop Completion

A workshop is considered completed when:

The user watches all workshop videos.

The progress bar reaches 100%.

Certificate Generation

When the user successfully completes the workshop:

A personalized certificate is generated automatically.

The certificate includes:

First Name

Last Name

Workshop Name

Completion Date

XO Workshops Branding

Instructor Name (Optional)

Certificate Delivery

After certificate generation:

The certificate is sent automatically to the user's registered email address.

The email includes:

Congratulations message

Certificate attachment (PDF)

Workshop completion confirmation

User Flow

Workshops Page → Select Workshop → Workshop Details Page

Not Enrolled:

**Watch Introduction Video → Click Enroll Now → WhatsApp
Registration → Enrollment Approved → Workshop Content Unlocked**

Enrolled User:

**Watch Lessons → Progress Bar Updates → Reach 100% Completion →
Certificate Generated → Certificate Sent by Email**

Design Requirements

Follow XO for Software branding.

Primary Color: Gray.

Modern and professional layout.

Responsive video player.

Clear lesson navigation.

Dynamic progress tracking.

Mobile, tablet, and desktop support.

Feature 7: My Enrolled Workshops Page

Overview

This page displays all workshops that the user has enrolled in. It provides a simple and clear view of the user's active learning progress across different workshops.

Page Purpose

- Show all workshops the user is currently enrolled in.
- Display progress for each workshop.
- Allow quick access to continue learning.

Page Components

Workshops Grid

The enrolled workshops are displayed in a simple grid layout.

Layout requirements:

- **Each workshop is shown as a card (box).**
 - **Multiple cards arranged in rows.**
 - **Responsive design for all devices.**
-

Workshop Card Components

Each workshop box must include:

Workshop Image

- **Display the workshop cover image.**

Workshop Name

- **Clearly shown as the main title.**

Enrollment Status

- **Indicates that the user is enrolled.**

Progress Percentage

- **Displays the completion rate of the workshop.**
- **Example: 45%, 70%, 100%**

Progress Indicator

- **Visual progress bar inside each card.**
- **Dynamically updates based on watched videos.**

Card Interaction

When the user clicks on a workshop card:

- **The user is redirected to the Workshop Details Page.**
- **The system opens the same workshop in enrolled mode (all content unlocked according to access rules).**

Empty State

If the user is not enrolled in any workshops:

- **Display a friendly message:**

Example:

“You are not enrolled in any workshops yet.”

- **Option to browse available workshops.**

Design Requirements

- **Clean and minimal UI.**
 - **Consistent with XO Workshops branding.**
 - **Primary color: Gray.**
 - **Clear progress visualization.**
 - **Responsive grid layout (mobile, tablet, desktop).**
 - **Smooth hover effects on workshop cards.**
-

User Flow

My Workshops Page → View Enrolled Workshops → Click Workshop → Continue Learning in Workshop Details Page

Feature 8: Instructors Page

Overview

The Instructors Page displays all instructors who are teaching workshops on XO Workshops. It provides users with detailed information about each instructor to build trust and highlight expertise.

Page Purpose

- Showcase all workshop instructors in one place.

- **Provide professional profiles for each instructor.**
 - **Allow users to explore instructor backgrounds and expertise.**
-

Page Components

Instructors Grid

- **All instructors are displayed in a responsive grid layout.**
 - **Each instructor is shown in a dedicated profile card.**
 - **Layout is optimized for desktop, tablet, and mobile devices.**
-

Instructor Card Components

Each instructor card must include:

Profile Picture

- **Display a circular profile image.**
 - **If no image is provided, use initials generated from the instructor's name.**
-

Full Name

- **Display the instructor's full name clearly.**
-

LinkedIn Profile

- **Provide a clickable LinkedIn link icon or button.**

- Redirects to the instructor's LinkedIn profile in a new tab.
-

About Instructor

- A short biography describing:
 - Professional background
 - Experience
 - Skills and expertise
 - Achievements
-

Card Interaction

- Clicking on an instructor card opens a detailed instructor profile page (optional future feature).
 - Otherwise, users can view all key information directly on the card.
-

Empty State

If no instructors are available:

- Display a friendly message:
“No instructors available at the moment.”
-

Design Requirements

- Clean and professional UI.

- Consistent with XO Workshops branding.
- Primary color: Gray.
- Modern card-based layout.
- Responsive design for all screen sizes.
- Smooth hover effects on instructor cards.

User Flow

User Opens Instructors Page → Views All Instructors → Clicks LinkedIn Profile or Reads About Section → Explores Instructor Backgrounds

XO Workshops Admin Dashboard

Overview

The Admin Dashboard is a secure control panel used by XO Workshops administrators to manage the entire platform. It provides full control over workshops, instructors, subscriptions, and system-wide statistics.

Feature 1: Statistics Dashboard Page

Overview

This page displays all platform statistics in a structured table format, giving administrators a clear overview of system performance.

Page Components

Statistics Table

The table must include real-time data retrieved from the database.

Key Metrics:

- **Total Users**
- **Total Workshops**
- **Total Enrolled Users**
- **Total Workshops Sold**
- **Total Completed Workshops**
- **Total Instructors**
- **Revenue (if applicable in future)**

Table Requirements

- Clean tabular layout
- Real-time or periodically updated data
- Sortable columns (optional)
- Responsive design

Purpose

- Provide full visibility of platform activity.
- Support data-driven decision making.
- Track growth and performance of XO Workshops.

Feature 2: Workshops Management Page

Overview

This page allows administrators to create, update, and delete workshops.

Functionalities

Add Workshop

Admin can create a new workshop with:

- **Workshop Title**
 - **Workshop Description**
 - **Instructor Assignment**
 - **Workshop Cover Image**
 - **Introduction Video**
 - **Workshop Price (if applicable)**
 - **Category**
 - **Status (Active / Inactive)**
-

Edit Workshop

Admin can:

- **Update workshop details**
- **Change instructor**

- Replace videos
- Modify pricing or status

Delete Workshop

Admin can:

- Permanently remove a workshop
- Or mark it as inactive (soft delete recommended)

Purpose

- Manage all learning content.
- Keep workshops updated and relevant.

The screenshot shows the 'XO Workshops' management dashboard. The main component is the 'Workshops Table' which lists various workshops with columns for Title, Description, Instructor, Category, Status, and Actions. Annotations provide details on table requirements, interactions, and deletion options.

Table Requirements: Real-time data updates, Sortable, Responsive layout

Table Interaction:

- [Workshop Title] → Click for Full Edit
- 👤 → Reassign
- 🔘 → Quick Activate/Inactivate
- ✎ → Open Full Editor
- 🗑️ → Confirm Deactivation (Soft Delete)
- ✅ → Restore

Soft Delete Recommendation: Permanent Deletion removes all data; Inactivation hides from public view but retains records.

****Conditionally Empty State / Add Workshop:**

Ready to create? Add a new workshop!

Add Workflow: Title → Desc → Instructor → Price → Video → Category → Status → Create

Purpose: Manage content. Update and relevant. Track

Feature 3: Instructors Management Page

Overview

This page manages all instructors in the system.

Functionalities

Add Instructor

Admin can add a new instructor with:

- **Full Name**
 - **Profile Picture (optional, or initials used)**
 - **LinkedIn Profile Link**
 - **About Description**
 - **Expertise Field**
-

Edit Instructor

Admin can:

- **Update instructor information**
 - **Modify bio or LinkedIn link**
 - **Change profile details**
-

Delete Instructor

Admin can:

- Remove instructor from system
- Or disable instructor visibility (recommended soft delete)

Purpose

- Maintain updated instructor profiles.
- Ensure only active instructors are displayed on the platform.

The screenshot shows the 'Instructors Management Page' of the X0 Workshops application. The page includes a navigation bar with links to Home, Manage Instructors, About Us, Settings, Manage Admins, and Logout. The main content area features an 'Instructors Table' with columns for Instructor Full Name, Expertise Field, About (Bio Snippet), LinkedIn Profile, Status, and Actions. The table lists several instructors, including Sarah Chen, David Miller, Lisa Wang, React Master, and David Miller. Annotations provide details on table requirements, workflow for adding instructors, and soft delete recommendations.

Table Requirements: Real-time data updates, Sortable, Responsive layout

****Conditionally Empty State / Add Instructor:**

****Add Workflow:**

1. Enter Full Name
2. Add Profile Picture or Initials
3. Add LinkedIn Link
4. Write About Bio
5. Specify Expertise
6. Click Create

Table Interaction:

- [Instructor Name] → Click for Full Edit
- Edit picture details
- Click to view in new tab
- Quick Activate/Inactivate
- Open Full Bio Editor
- Confirm Deactivation
- Restore

Soft Delete Recommendation: Permanent Deletion removes all data; Inactivation hides from public view but retains records.

Purpose: Maintain updated profiles. Ensure only active instructors. Track instructor performance.

Feature 4: Subscriptions Management Page

Overview

This page controls all workshop enrollment subscriptions.

Functionalities

Add Subscription

Admin can manually create a subscription when needed:

- **User Selection**
 - **Workshop Selection**
 - **Enrollment Date**
 - **Status (Active / Completed / Expired)**
-

Edit Subscription

Admin can:

- **Update subscription status**
 - **Extend access**
 - **Modify user-workshop relation**
-

Delete Subscription

Admin can:

- **Remove a subscription record**
 - **Revoke workshop access if necessary**
-

Purpose

- **Control user access to workshops.**

- Manage enrollment lifecycle.
- Track active learners.

Security Requirements (Admin Dashboard)

- Admin authentication required.
- Role-based access control (RBAC).
- Sensitive operations require confirmation.
- Audit logs for changes (recommended).

The screenshot shows the 'Subscriptions Management Page' of the 'XO Workshops' application. The page includes a navigation bar with links to Home, Subscriptions Dashboard, About Us, Settings, Manage Admins, and Logout. The main content area features a 'Subscriptions Table' with columns for Subscription ID, User, Workshop, Enrollment Date, Expiry Date, Status Toggle, and Actions. The table lists six subscriptions, with the first five being 'React Masterclass' and the sixth being 'React'. Annotations highlight various features and requirements:

- Table Requirements:** Real-time data updates, Sortable, Responsive layout.
- Soft Delete & Revocation Recommendation:** Permanent Deletion removes all data; Revocation hides from public view but retains records for audits.
- Security Requirements:** (Audit Logged) and (RBAC Confirmed).
- Add Subscription:** A modal form with a title 'Add Subscription' and a description 'Ready to create a new access? Add a subscription!'. It includes an 'Add Subscription' button.
- **Conditionally Empty State / Add Subscription:** A note pointing to the 'Add Subscription' button.
- **Add Workflow:** A list of steps: 1. Select User, 2. Select Workshop (Dropdown), 3. Choose Enrollment Date, 4. Set Status, 5. Set Expiry (Date), 6. Click Create.
- Table Interaction:** A list of actions: [Subscription ID] (Click for Details), [User Profile] (View User Profile), [Workshop Details] (View Workshop details), [Status Toggle] (Quick Activate/Inactivate), [Edit Access] (Open Access Editor), [Deactivation] (Confirm Deactivation), [Revoke] (Revoke content).

Purpose: Control access. Manage lifecycle. Track active learners. Audit all changes.

Overall Admin Flow

Admin Login → Dashboard → Select Section (Statistics / Workshops / Instructors / Subscriptions) → Perform CRUD Operations → System Updates Real-Time
